TREATMENT FOR COMMON HUMAN CORONAVIRUSES
There is no vaccine to protect you against human coronaviruses or specific treatments for illnesses caused by human coronaviruses.
Most people with common human coronavirus illness will recover on their own.

However, to relieve your symptoms you can:
Take pain and fever medications (Caution: do not give aspirin to children)
Use a room humidifier or take a hot shower to help ease a sore throat and cough
Drink plenty of liquids
Stay home and rest
If you are concerned about your symptoms, contact your healthcare provider.
